PREFACE

THIS bibliography has a twofold purpose: to provide for all students of English a simple but complete book of reference, and, at the same time, to assist those special students who may desire to follow the history of linguistic investigation in this field. I have adopted a chronological arrangement of titles within the various topical subdivisions. Thus the student who is interested merely in consulting the most recent books or articles on any particular aspect of the language can turn at once to the latest entries and work back until he finds what he wants, while the historical student can begin at the beginning and trace the course of investigation in any special phase of English down to the present day.

No apology is needed, I trust, for including many works of a rather superficial character. To omit them would have impaired the usefulness of the Bibliography to the historical student, who needs, of course, exhaustive information. For the same reason I have noted different editions, and even some reprints, of the more important books.

Yet, despite this ambition to supply an exhaustive index to the history of the study of our language, I have been forced, for practical reasons, to exclude a good many titles. In general, the materials included deal rather with the scientific study of English than with the artistic. Works that treat of literary style and the art of expression have been omitted, unless they emphasize questions of grammatical usage. Rhetorics and textbooks on composition published after A.D. 1800 and all studies of versification have been ruled out.

Limitations of time and space have forced the exclusion of many works of an interlingual character — primers, readers, grammars, and dictionaries — intended to teach English to foreigners. In the case of special dictionaries of a technical nature, — as of law, medicine, etc., — which are often encyclopedic rather than glossarial, it has been necessary to draw a rather arbitrary line, and to register only such as are most strictly philological, or such as assemble vocabularies rarely examined by linguistic investigators.

Of the multitude of elementary grammars, dictionaries, and other textbooks intended for the lower grades of schools, only a few have been included from the period subsequent to 1800. Similarly, in the final chapter, numerous books and articles bearing upon the more elementary phases of English study are ignored. This chapter is intended to furnish merely a selective list of works on theory and method.

The three word-indexes beginning, respectively, on page 141 (Anglo-Saxon), 184 (Middle English), and 312 (Modern English), do not profess to exhaust the wealth of lexicographical matter that lies scattered in the various journals of philology. However, these indexes serve to record numerous studies of single words that I have noted in checking through the more important periodicals, some of which are ordinarily not easily found. The same observation applies to the collections of word-studies in Chapters II, V, VI, and VII.

Minute classification of titles has been avoided as far as possible. Besides the division into ten general chapters, there are, in each chapter, three grades of classification, descending from the most general books and articles — which immediately follow the sectional headings (always numbered with capital letters) — through the material arranged under the general topical headings (numbered with Arabic numerals), to studies of most limited scope, which are placed under the special topical headings (numbered with small letters).

Whenever special bibliographies exist, they are listed at the beginning of the sections or subdivisions in which they belong, and are set off from the titles that follow by a short bar. Titles of serial publications on the subject are placed at the end of the regular titles and set off in a similar manner.

Occasional departures from a chronological arrangement are indicated by the word “alphabetical” in the heading. The reason for such departure will be obvious in every instance.

In the Subject Index many special topics are indicated that have not received special classification in the body of the book. However, a search for material pertaining to any special topic which the reader may have in mind must, of course, involve a working backward through the more general topical divisions in the Bibliography and through the lists of the most general studies immediately following each sectional heading.

Cross references are very numerous, and this has involved some duplication of titles.

The book is the result of some fourteen years' research. All available bibliographies have been checked, and for the period from 1875 to 1922 it is not likely that much of importance has been overlooked. For the first three quarters of the nineteenth century I have found it impossible to make so thorough a survey as for the later period, since the output of that earlier time is, in many instances, too antiquated to have been deemed worthy of note by recent writers and not old enough to have excited the interest of philological historians. For the period before 1800 I have made every effort to discover everything of importance, but no doubt a considerable number of obscure books and pamphlets may still be found in the great libraries or in out-of-the-way places.

More than fifteen thousand volumes of serial publications have been checked, either by means of general indexes or volume by volume. This process, covering as it does a period from about A.D. 1700 to the present time, has brought to light most of the contemporary publications on the English language. Reviews have been included whenever they have any value. Special attention, indeed, has been accorded to reviews, not only because of their critical importance, but also because they furnish a continuous index to the history of the linguistic study of English by virtue of the data they furnish and the opinions they express.

In some cases I have found it impossible to inspect the books or articles recorded. For each unverified title I have cited my authority in brackets immediately following the title, and in the case of authorities often cited, I have employed abbreviations which are explained in the list of Abbreviations and Definitions.

As to books and articles published anonymously, though I have spent much time in determining the authorship in special cases, I have generally felt that it is safer to label the entry "Anon." This abbreviation means simply that the book or article was printed without the author's name and that sufficient evidence is not at hand to justify me in supplying it.

The Bibliography is offered to students of English with all due modesty. Specialists in any part of the field will no doubt be able to supplement the material that it contains. It will serve, I trust, as a foundation upon which may ultimately be built, by coöperative effort, a work of such accuracy and comprehensiveness as shall satisfy the most exacting requirements.

My obligations to previous bibliographers are so obvious that particular acknowledgments are hardly needed. I have made use of practically all the bibliographical collections that deal in any way with the subject of English. I cannot adequately express my appreciation of the courtesy and helpfulness which I have met with in all the libraries, great and small, in which it has been my privilege to work. I am especially indebted to the librarians and other officials of the Harvard College Library, the Yale University Library, the British Museum, the Bodleian Library, the Library of Congress, and the Public Libraries of New York and Boston. For shorter periods I have enjoyed the hospitality of the libraries of the University of Chicago, the University of California, Cornell University, the University of Nebraska, as well as of the Boston Athenaeum and the California State Library. Most of all I am indebted to the unfailing courtesy and constant helpfulness of my friends and co-laborers in the Library of Stanford University, where I began the preparation of this book and where much of my work upon it has been done.

For financial assistance enabling me to spend some time working in eastern libraries I am indebted to the Committee on Research of Stanford University. And, finally, to various colleagues at Stanford and to numerous fellow workers in English elsewhere I am grateful for not a little good advice and encouragement. Since it would require much space to make adequate acknowledgment to all, I can give here only a general expression of my obligation. I wish, however, to acknowledge especially my indebtedness to Professor George Lyman Kittredge of Harvard University and to Professor John S. P. Tatlock, until recently my colleague at Stanford University, because of the very helpful interest they have shown, both in the work of compilation and in the business of publication.

* In deciding which titles should be entered in Chapter II rather than in Chapter VII (Modern English), I have followed the principle that any work of a general nature likely to be utilized in more than one of the chapters following this one should be entered here. I have included, therefore, not only historical studies, but also philosophical, bibliographical and serial works as well.

The line drawn between Chapters II and VII is of necessity not always a clear one, and in case of doubt the reader should always refer from one chapter to the other in seeking special material.

a. THE NEW ENGLISH DICTIONARY

"But the critical student will not find that his wishes are obtained [in Webster's Dictionary of 1828], and his hope satisfied; but will still look forward to that happy hour, when he will behold in one great Thesaurus, the treasures of his native tongue laid up in lucid and beautiful order, with everything of history belonging to it." English phrases, with Latin equivalents. Also Latin and French indexes at end of book.

* With a few exceptions only those dictionaries have been listed which were publ. before 1800 A.D. Since Anglo-Foreign dictionaries have been compiled for almost all tongues of earth since 1800, it is obviously impossible to give either a complete list here, or even a judicious selection sufficiently comprehensive to meet general needs. Such dictionaries may be found listed in the bibliographies given at the head of this subdivision.

2713. Junius, Hadrianus. *Nomenclator, omnium rerum propria nomina variis linguis explicata indicans; etc.* Antwerp, Chr. Plantinus. 1577. [viii] + 432 pp. + index.

Only an occasional English word or phrase.

"There are some errors in the account of Florio's work by Lowndes. He mentions four editions in 1595 or 1597, 1598, 1611, and 1659; but Torriano says that 'in the year 1611 John Florio set forth a second edition of his Italian and English dictionary... intending (if he had lived) a third edition; which he had left behind him in a very fair Manuscript, perfected and ready for the press.' There was, however, certainly an edition... in 1598."

"It has, however, three grand characteristics, of which no time or successor can ever deprive it. 1. It was the first English Dictionary that could in any way be considered as standard, all its predecessors being mere lists of words in comparison. 2. Johnson was the first to illustrate his meanings by quotations from the standard authors. 3. His definitions are above all praise in their happy illustration of the meanings of words. It is possible to quibble at them, now, but this department is one of the most difficult in Lexicography, and he had no assistance from his precursors, whose explanations are usually miserable in the extreme." *Wheatley, Trans. of Phil. "Three curiosities of English lexicography may be mentioned in closing. One is the reproduction, by several publishers, forty years after its original appearance (the copyright having meanwhile expired), of the Webster Unabridged of 1847. It was photographed page by page, and what are practically stereotype plates executed... From these plates various editions, exhibiting various degrees of bad printing, were worked off, generally on miserable paper, and with flimsy binding, rendering it possible to sell the work at a trifling sum, a dollar or less." *Tucker, Our Common Speech*, p. 139.

* Only a selective list of titles is offered in this chapter. Most of the books and articles treating of secondary school study and teaching of English have been excluded, as well as those for the higher grades in which the teaching of literature rather than the language is emphasized. Of course the pedagogical journals are replete with such studies, and most good books on the subject of secondary school teaching of English have bibliographies, also.

* I cannot pretend to a knowledge of the identity of all the persons named in this work. No systematic effort has been made, therefore, to distinguish in this index the different bearers of the same name, although some of the more obvious cases have been emphasized by means of dates. I have not, moreover, undertaken to bring together, always, the different forms of the name of a person, owing to the almost insurmountable difficulties arising from the practice of using initials at one time and full Christian names at another, or the more perplexing practice of changing a name more completely. The slight variations have been ignored in the index, or else called attention to by the placing of variant forms in parentheses after the main headings.
